FEATURE ARTICLES

Adams, Charles, John Kusters and **Albert Benjaminson,** "Measurement Techniques for Quartz Crystals," August, p. 22.

Allan, D. W., L. Fey, H. E. Machlan and **J. A. Barnes,** "An Ultra-Precise Time Synchronization System Designed by Computer Simulation," January, p. 11.

Alpert, Arnold, and **Donald J. Murphy,** 'Establishing, Synchronizing and Maintaining a Standard Clock for the USAF Calibration Program," May, p. 17.

Andrews, David H., C. Chaslain, J. DePrins, "Reception of Low Frequency Time Signals," September, p. 13.

Bowker, J. F., and **R. L. Fried,** "The Application of Digital Integrated Circuits to a Commercial VLF Receiver/Comparator," May, p. 22.

Bridges, J. E., and **R. Zalewski,** "Magnetic Shielding Characteristics of Flexible Braid Coaxial Cable," October, p. 20.

Cohen, Stanley A., "Modulation Factors for Amplitude Modulation," November, p. 22.

DiMarzio, A. W., "Simplified Interference Analysis of Waveshapes," May, p. 12; June, p. 17.

Dishong, W. R., Jr., "Resource Effectiveness Analysis Procedure for Communications Systems," March, p. 14.

Geckle, W. A., Jr. and **R. C. Brackney,** 'An Ultra-Linear Voltage Controlled Oscillator With Crystal Oscillator Stability," November, p. 18.

Gray, David G., "How To Prepare For Your Next EMC Test," August, p. 26.

Guttwein, G. K., A. D. Ballato and **T. J. Lukaszek,** "Design Considerations For Crystal Resonators," September, p. 22.

Holmbeck, John D., "Writing Crystal Specifications," July, p. 23.

Hughes, R. J. and **R. J. Sacha,** "The LOHAP Frequency Synthesizer," August, p. 12.

Ishii, T. Koryu, Stanley V. Jaskolski and **Mohammed N. Al-Moufti,** "Experimental Double-Carrier GaAs Bulk Effect Diode Transmitter," January, p. 15.

Lyon, J. A. M., C. J. Digenis and **W. W. Parker,** "The Reduction of Coupling Between Antennas on an Aerospace Vehicle," December, p. 13.

March, Daniel L., Dr. S. Tashiro and **W. R. Sanders,** "Meteor Trail Forward Scatter Time Synchronization System," February, p. 12.

Marker, Thomas F., "Crystal Oscillator Design Notes," April, p. 12.

Morakis, Dr. James C., "Bandwidth Optimization For Frequency Shift Keying," February, p. 18.

Shapiro, L. Dennis, "Loran-C Timing and Frequency Comparison," March, p. 22.

Sherman, John H., Jr., "Report and Analysis of the 1967 Quartz Crystal Industry Survey," June, p. 12.

Shumaker, Maurice J., Sr., "The Effects of Sustained High G Loads on Quartz Crystals," November, p. 13.

Smith, C. E. and **E. R. Graf,** "An In-Line Bandpass Filter For Use With VLF Receivers," October, p. 18.

Toman, M. P. and **T. K. Ishii,** "Resonance Characteristics of Klystron Cavities," December, p. 24.

Van Steenberg, G. N. and **J. F. Willman,** "Innovated RIFI Meter Calibration Method," June, p. 23.

Vessot, Robert F. C., Martin W. Levine, Leonard S. Cutler, Milton R. Baker and **Louis F. Mueller,** "Progress in The Development of Hydrogen Masers," July, p. 11.

Warren, W. B., "Suppression of Spurious Signals By Frequency Division," October, p. 15.

Wright, J. R., "Results Of Differential Omega Test And Evaluation Program," July, p. 18.

PULSES & IMPULSES

Anderson, Tore N., "Primary Standard Dimensions for Type N Connectors Established By USASI Committee on RF Connectors," July, p. 28.

Eisen, Louis H., "Reading Wavemeter Accuracies Directly on a Counter," October, p. 30.

Feix, Dr. Gerhard, "Noise of the Atmosphere at Millimeter Wavelengths," November, p. 27.

Graf, Calvin R., "A Simple Bi-Static Observation of Meteors and Aircraft at High Frequency," October, p. 30.

Hornback, Alton B., "The Hydrogen Maser and the Special Theory of Relativity," November, p. 25.

Jobe, David J., "Is Your Black Box Out Of Spec — Or Are You Measuring Power Line Conducted Ambient?" November, p. 26.

Johnson, Gilbert F., "Vibration Characteristics of Crystal Oscillators," February. p. 30.

Johnson, Gilbert F., "Vibration Characteristics of Crystal Oscillators," February. p. 30.

NBS Office of Technical Information, "The Bolovac, Voltage and Current Measurements to 10 GHz," January, p. 25; "Low-Frequency Digital Phasemeter Assembled from Logic Modules," February, p. 34; "Precise Temperature Control for Calorimetric RF Power Measurements," April, p. 27; "Nonmagnetic Laboratory for NBS," June, p. 26.

Ohata, Yoshio, "Quick Measurement of Quartz Crystal Resistance," December, p. 37.

Rothenberg, Robert A., "Corrosion Considerations Pertinent to the Use of Electromagnetic Shielding Gaskets," December, p. 32.

Russell, Jack, "Time vs. Frequency Nomograph," July, p. 32.

Sauerbrey, Dr. G., "Design of Plano Convex Crystal Plates," January, p. 23.

Smith, C. E. and **E. R. Graf,** "VLF Phase Anomalies Produced by the Solar Flares of July 8 to 11, 1968," December, p. 39.

Steiner, Claude, "Atomic Clocks," March, p. 29; April, p. 20; May, p. 25.

Voyles, Richard E., "Technical Comparison of Techniques for the Accurate Measurement of Microwave Frequencies," September, p. 30; October, p. 32.

DESIGN TIPS FROM THE U. S. SPACE PROGRAM

"Interference Effects Eliminated in Random Oriented Space Station," April, p. 24.

"Oscillator Circuit Operates as Digitally Controlled Frequency Synthesizer," April, p. 26.

"Unique Frequency-Shift-Keyed Demodulation System," July, p. 29.

"Portable Pulse Code Modulation Subsystem," July, p. 31.

"Apparatus Makes Klystron Operating Frequency Adjustable From Remote Point," August, p. 30.

"Phase-Lock Loop Frequency Control and the Drop-out Problem," August, p. 30.

"Diversity RF Receiving System with Improved Phase-Lock Characteristics," August, p. 31.

STAFF REPORTS

"RFI — Whose Responsibility?" January, p. 19.

"RFI/EMC and Microelectronics," February, p. 27.

"Latest Trends in RFI/EMC," March, p. 25.

"Practical Notes for RFI/EMC: Bonding," April, p. 17.

"Guide Lines For Frequency Selection," November, p. 38.

CONFERENCE REPORTS

IEEE Convention and Exhibition, March, p. 40.

Frequency Control Symposium, April, p. 4.

The Twenty-Second Annual Frequency Control Symposium, June, p. 6.

WESCON Preview, August, p. 32.

EMC Symposium, September, p. 41.

NEREM '68, October, p. 4.
